IQ 355

DIGITAL WEIGHT INDICATOR

High Performance, High Durability, Low Price.

The IQ plus® 355 is built to outlast and outperform any other indicator in its class. Providing the ultimate protection, the IQ plus 355 is encased in a tough, all stainless steel NEMA 4X/IP66 enclosure for extra-long life, even in the harshest conditions. The ultra-bright, oversized display reduces operator error and accelerates productivity.

Fully interactive, the IQ plus 355 features two independent communication ports for complete EDP and print ticket programmability. It easily programs two formats with up to 300 characters, allowing you to create complex custom tickets.

The IQ plus 355 drives up to eight 350-ohm load cells, making it the perfect choice for simple multi-cell applications. Additionally, it features RATTLETRAP® three-stage digital filtering for eliminating most vibration interference and providing stable, accurate weight data regardless of environment. A simple five-button front panel provides easy operation with full calibration and configuration.

The IQ plus 355 provides two print formats that can be customized to include up to 300 characters on printed tickets.
